These are the same CSFs I also saw in the e-jacket in OPPIN, but as Erik noted, more recent CSFs would be in the paper jacket. There have been a few minor formulation amendments submitted since the date of the last CSF in the e-jacket, but in looking at that product's formulation, any alternate CSF approved as a minor formulation amendment would also not contain a PFAS active or inert ingredient (just as the CSFs in the e-jacket do not—the product is sumithrin + piperonyl butoxide along with some solvents).

Kerry

Hi Catherine and Kerry,

Attached are the csfs in the imaged jackets. The most recent csfs would be in the paper jacket in the office. I don't see any csfs in documentum or in chem. docs.

This is the link to the latest label. https://iaspub.epa.gov/apex/pesticides/f?p=PPLS:102:::NO::P102_REG_NUM:1021-1688

Thanks
Erik

Importance: High

Erik, Kerry:

Could your teams please pull the label and CSFs (anything electronic) for this product?

Anvil 10+10 UVL EPA Reg #1021-1688-8329

This is in reference to a R1 report that a state detected potential contaminants from samples used for aerial application for mosquito control. This is a high priority request; please provide what you can today.

Best,
Catherine
